Show Details

Attached are a couple of maps.

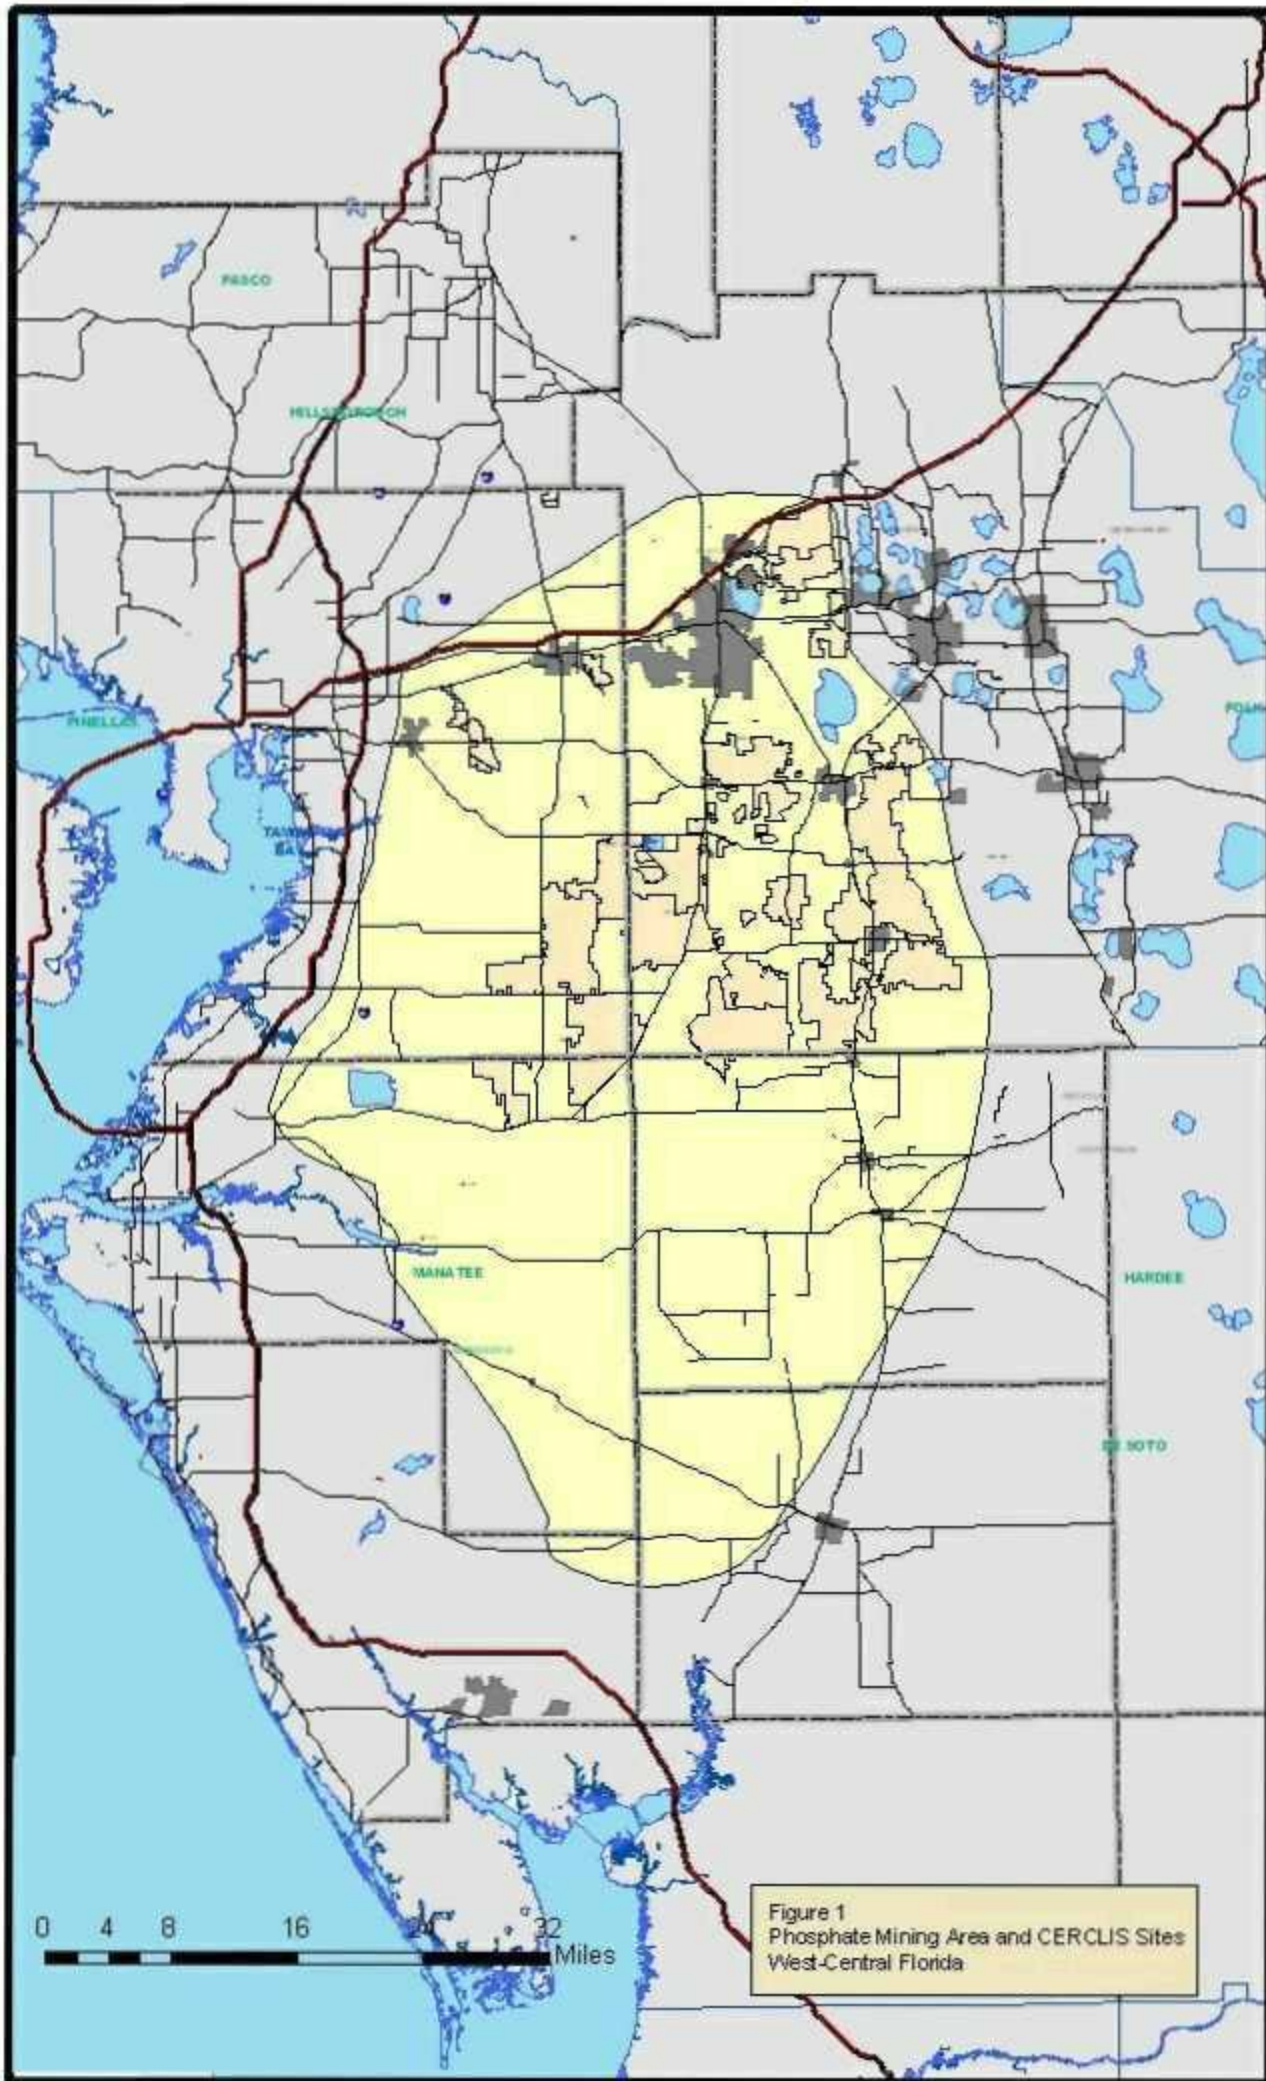

I also talked with Marianne and she said she's available to help in collecting the contact info. She also said if you're interested, she might could get you the contact information that they are using on the EIS. She also said if you're interested, she could check to see if they have some data bases that could be searched for contact info.

I also wondered if the "MyFlorida 411" might be helpful in getting the contact info for the state/county/municipal contacts.

Let me know.

Thanks,

Brad Jackson
